BIOGAS PORTFOLIO
INTO BIOMETHANE

2006

Launch of
Green Genius.

2011

First solar power
plant in Lithuania.

2014

First biogas power plant
launched in Lithuania.

2021

Launched Wind business line.

2020

Started to provide energy
from remote solar power
plants in Lithuania.

2019

Green Genius awarded
as the most innovative
business in Italy.

2022

Started development
in Romania with a
goal to reach 500 MW
of assets.

2023

Green Genius won the European
Commission's subsidy of 2.6 million euros for
a pilot solar power plant and energy storage
project.

JV with Eiffel IG in ITA to finalize development
& construction of 500 MW of Solar PV.
First biogas power plant launched in Poland.

2024

Received an equity investment of
up to € 100M from the EBRD.

Constructed 1st Wind park.
Started largest biomethane
production project in the Baltic
region.

END-TO-END RENEWABLE ENERGY DEVELOPMENT

DEVELOPMENT

Solar PV, Wind, Biogas/ Biomethane and storage development capabilities.

Experience in executing in-house and external development models.

In-house development on the ground in Spain, Poland, Italy, Romania and Lithuania.

EPC MANAGEMENT

In-house engineering. Competences in engineering complex projects such as Biogas, Biomethane and Solar PV.

Strategic planning, execution and control of the procurement process.

Construction management capabilities. Physical construction is procured from third party suppliers.

More than 500 MW of projects already built or in construction.

OPERATIONS & MAINTENANCE

Operation and Maintenance of more than 200 MW of Solar PV in Poland, Lithuania and Ukraine.

Professional O&M of 11 separate Biogas facilities throughout Lithuania and in Poland.

PPA ORIGATION

In-house Trading & Origination Team (10+ years of experience) responsible for structuring individual Wind & Solar PPA (physical or financial) contracts and Biomethane trading. Extensive cross-border PPA experience.

Sales team (10+ years of experience) contracted 300 MW of PPAs incorporated into retail agreements with a diversified portfolio of corporate clients.

PROJECT FINANCE & M&A

Completed transaction volume of around €1 billion.

Team of 10 finance professionals with expertise in originating and structuring project finance and M&A transactions.

TRANSPORT DECARBONIZATION

Green Genius' Transport Decarbonization business line focuses on producing biomethane as a sustainable alternative to natural gas for transportation while exploring molecular business solutions such as hydrogen and synthetic fuels.

GOALS:

2025 m.
100 GWh
Biomethane
production

Biomethane
development

ENERGY DECARBONIZATION: SOLAR, WIND, BATTERIES

Green Genius' Energy Decarbonization business line focuses on developing solar, wind, and battery storage projects to accelerate the transition to clean and sustainable energy.

CURRENT CONSTRUCTION GOALS:

SOLAR 525 MW

WIND 17 MW

BATTERIES 132 MW
(pre-construction phase)

New BESS development
and Existing Solar
portfolio hybridization
and new ones in
IT, PL, LV, RO, LT

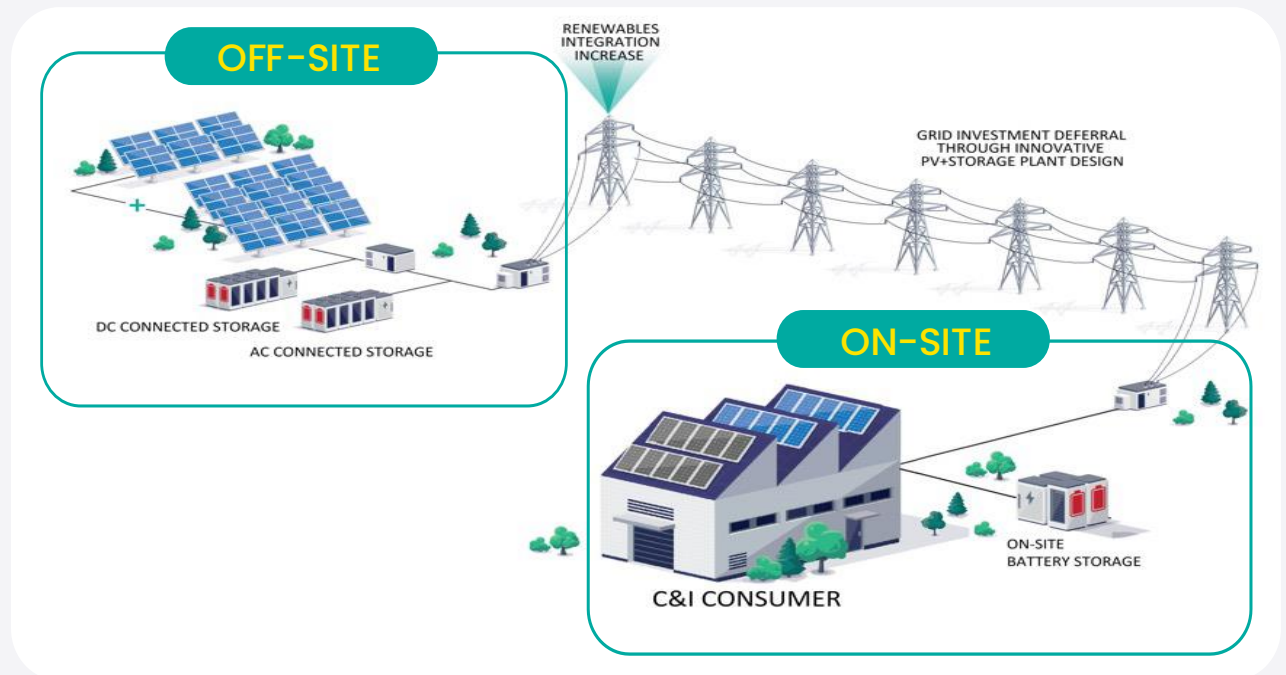

THE InnoSolveGreen PROJECT

The InnoSolveGreen project is the first Solar PV and Battery energy storage systems (BESS) project in Lithuania that covers 100% of the annual electricity needs of an industrial customer using a combination of on-site and off-site solar power plants, which is being developed by GREEN GENIUS who will also be the general EPC contractor.

The InnoSolveGreen project has been awarded a grant from The European Climate, Infrastructure and Environment Executive Agency (CINEA). This was the first project to receive such grant from CINEA in the Baltics.

After the implementation of the project, 100% of the customer's electricity consumption needs will be met from renewable sources yearly.

Beehives
in
solar plant

WE SUPPORT BEES

We pay special attention to building a sustainable, conscious, and ecological community.

Bee farming is one of the ways to do it, at the same time allowing us to take care of the constantly declining bee population.

We care about the nature and therefore have accommodated few beehives in our solar power plants - we seek to contribute to the saving of bee population on Earth.

TURN FOOD WASTE INTO ENERGY

2024

In collaboration with our non-food industry partners (SEB, IKEA, Telia, etc.), 66 tons of food waste were saved and recycled into electricity.

The proceeds from this project were donated to SOS Children's Village (SOS vaikų kaimai Lietuva), helping to fund extracurricular activities and tutoring for children, giving them more opportunities to learn and grow.

66 tons
of food waste

=

13 454 kWh
Of electricity

We recycle food waste
into **energy, heat** and
fertilizers

MODUS GROUP AT A GLANCE

RENEWABLE ENERGY

Developing biogas, solar, wind and hydrogen energy projects in 8 European countries.

AUTOMOTIVE

Automotive business line represents 18 world-famous car brands from economy to luxury cars.

MOBILITY

Provides smart mobility solutions to increasingly faster-living society and cities moving towards greener future needs.

ASSET MANAGEMENT

A licensed fund management company.
